DEA NATIONAL ^{Rx}
TAKEBACK

If you don't properly dispose of the unneeded medications in your home, they might find a new one.

- Don't flush! Medicines flushed down the drain contaminate our lakes and streams, which can hurt fish and other aquatic wildlife, and end up in our drinking water.
- The majority of opioid addictions start with prescription pills found in medicine cabinets at home.
- A majority of people who misuse a prescription medication obtained the medicine from a family member or friend.
