

ETHICS IN PREVENTION

What is the Ethics in Prevention training?

This is a 7-hour course of study in ethics in substance abuse prevention. It will be delivered via a virtual format. Training link will be provided with registration confirmation. Developed by the Substance Abuse and Mental Health Services Administration's Center for the Application of Prevention Technologies for entry level and experienced prevention practitioners. This training covers the six principles of the Prevention Code of Ethics and utilizes a formalized ethical decision-making process.
